

Key Resin MMA Resinous Floors

The requirements for today's flooring systems, both decorative and industrial are more stringent than ever. Traditional resinous floor systems requiring long shutdowns for installation and curing are becoming less acceptable. These systems are being replaced with faster curing systems without sacrificing the excellent performance properties of the traditional technologies. In keeping with our goals of supplying the best resinous flooring systems in the industry, **KEY RESIN's Methyl Methacrylate (MMA) Flooring** systems offer the piece of mind of a proven flooring material.

KEY ADVANTAGES

- 100% solids reactive methyl methacrylate resin
- Extremely fast cure - 1 to 2 hrs. per coat
- Install in temperatures down to -20°F
- UV Light Resistant - Ideal for exterior and interior applications
- High impact and wear resistance
- Excellent resistance to acids and alkalis

Available as a clear or solid color sealer, self leveling decorative quartz and chip, or troweled mortar system.
