

Key Resin Company's Decorative Resinous Flooring Guide

Key Epoxy TERRAZZO,

A resinous flooring system that combines the highly decorative appearance of marble with durability, chemical resistance & ease of maintenance. Key Epoxy Terrazzo provides virtually unlimited freedom in color and layout design.

lowest life cycle cost · timeless beauty and durability ·
signature product · may contribute to LEED credits

Key LUSTER METALLIC,

A decorative thin-film system having a bright metallic finish. Finished with a clear topcoat, the system provides a highly decorative and artistic look to your designer floor or wall application.

highly decorative & artistic · signature product ·
low odor · chemically resistant

Key Chip-100,

A seamless, 100% solids, decorative vinyl-flake floor coating system. It provides excellent wear & abrasion resistance, ease of maintenance, and chemical resistance.

low maintenance · excellent wear & abrasion ·
low odor installation · chemically resistant

Key QUARTZ SYSTEMS,

A seamless, durable, and decorative resinous flooring system. Its distinctive and pleasing appearance and outstanding performance characteristics make it ideal for applications requiring chemical resistance, non-skid texture, and ease of maintenance.

decorative quartz appearance · resistance to bacterial growth ·
highly durable · chemically resistant · integral cove

Key AUXILIARY ITEMS,

Key provides auxiliary items including Moisture Vapor Treatment products, membrane systems, flexible and rigid crack fillers, joint fillers and seamless wall systems.

single source supplier · chemically resistant ·
100% compatible · superior quality

Key INDUSTRIAL SYSTEMS,

Range from $\frac{1}{16}$ " slurries to $\frac{1}{4}$ " trowel-down systems. They provide seamless, low maintenance floors that are wear, impact, and abrasion resistant, capable of extreme temperature changes, & highly chemical tolerant.

resist heavy traffic and abuse · chemically resistant ·
low maintenance · resistant to thermal shock

Materials include: 100% Solids Epoxy · Methyl Methacrylate (MMA) · Urethanes · Polyaspartics
